Introduction

The Economic and Social Commission for Western Asia (ESCWA) is pleased to present the Tenth issue of the Bulletin on Population and Vital Statistics in the ESCWA Region.

The purpose of the publication is to provide available data and statistics on ESCWA countries' registered vital events (births, deaths, marriage and divorce), as well as the main indicators for each of these events and to compare them with the estimates prepared by the United Nations Population Division¹ in New York.

This issue includes vital statistics and indicators from 2000 to the date of preparation of this publication. Data before 2000 are available in the previous issues of the bulletin. The Bulletin has been revised where some changes have been introduced and reflected under each of its three sections.

The first section covers the population in ESCWA region; the second section presents data on the fertility and mortality; and the third section provides statistics and indicators related to marriage and divorce.

In order to standardize the basis of comparison, the estimates of the United Nations Population Division (2000, 2002, 2004 and 2006 Revisions) were used as the denominator for vital events in the calculation of the rates.

Data contained in this Bulletin were compiled from national statistical sources including: annual statistical yearbooks and vital statistics publications and by using questionnaires prepared by ESCWA for this issue. Data for Lebanon were obtained from the Ministry of Interior.

We hope that this publication will meet the needs of data users, especially researchers, academics and those working in the field of population, reproductive health and development by providing a comprehensive picture on population growth and its dynamics.

Last but not least, the Executive Secretary would like to thank the member states for providing her with the requested data and hope for maintaining this fruitful cooperation.

يسر اللجنة الاقتصادية والاجتماعية لغربي آسيا (الاسكوا) أن تقدم العدد العاشر من "نشرة السكان والإحصاءات الحيوية في منطقة الاسكوا".

وتهدف النشرة إلى عرض البيانات والإحصاءات المتوفرة عن الوقائع الحيوية المسجلة (المواليد، الوفيات، الزواج، الطلاق)، وعرض بعض المؤشرات الرئيسية المتصلة بكل من هذه الوقائع مقارنة ببعض التقديرات التي أعدتها شعبة السكان في الأمم المتحدة في نيويورك⁽¹⁾.

وقد تضمن هذا العدد إحصاءات ومؤشرات منذ العام ٢٠٠٠ وحتى تاريخ إعداد هذه النشرة. بيانات ما قبل عام ٢٠٠٠ متوفرة في الأعداد السابقة للنشرة. وقد تمت مراجعة النشرة وأدخل بعض التعديلات عليها مشار إليها تحت كل من اجزائها الثلاث.

يغطي القسم الأول بيانات عن السكان في المنطقة، ثم يعرض القسم الثاني إحصاءات الخصوبة والوفيات في حين يقدم القسم الثالث الإحصاءات والمؤشرات الخاصة بالزواج والطلاق.

وتوخيا لتوحيد أساس المقارنات، استخدمت تقديرات شعبة السكان في الأمم المتحدة في نيويورك (مراجعة العام ٢٠٠٠ والعام ٢٠٠٢ والعام ٢٠٠٤ والعام ٢٠٠٦) بصفتها مقاما للوقائع الحيوية في احتساب المعدلات.

هذا واستمدت البيانات المستخدمة في هذه النشرة من المصادر الإحصائية الوطنية، مثل المجموعات الإحصائية السنوية، ونشرات الإحصاءات الحيوية ومن استبيانات أعدتها الاسكوا لهذا الغرض. استمدت بيانات لبنان من وزارة الداخلية.

ونأمل أن تلبى هذه النشرة احتياجات مستخدمي البيانات، ولاسيما الباحثين والاكاديميين والعاملين في مجال السكان والصحة الإنجابية والتنمية من خلال اعطاء صورة شاملة عن نمو السكان وديناميكياته.

وأخيرا وليس آخيرا، تود الأمانة التنفيذية للاسكوا تقديم الشكر الى الدول الأعضاء على تزويدها بالبيانات المطلوبة وتأمل الاستمرار بهذا التعاون المثمر.

The 2006 Revision. Vol. 1: Comprehensive Tables*. New York, 2007.

DEFINITIONS¹:

The following vital events which are included in the Bulletin are:

1. Live birth
2. Death
3. Marriage
4. Divorce

Their definitions are as follows:

1. Live birth occurrence

Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered livebirths.

2. Death occurrence

Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (post-natal cessation of vital functions without capability of resuscitation). This definition therefore excludes foetal death.

3. Marriage occurrence

Marriage is the act, ceremony or process by which the legal relationship of husband and wife is constituted. The legality of the union may be established by civil, religious or other means as recognized by the laws of each country.

¹ Source: United Nations, "Demographic Yearbook 1995"

4. Divorce occurrence

Divorce is a final dissolution of a marriage, that is, the separation of husband and wife which confers on the parties the right to remarriage under civil, religious and/or other provisions, according to the laws of each country.

VITAL RATES²

The vital rates contained in this publication are the following:

I. Births and Fertility Rates:

1. Crude Birth Rate (CBR)
2. General Fertility Rate (GFR)
3. Age Specific Fertility Rate (ASFR)
4. Total Fertility Rate (TFR)
5. Gross Reproduction Rate (GRR)
6. Mean Age of Childbearing (MACB)

II. Mortality Rates:

7. Crude Death Rate (CDR)
8. Infant Mortality Rate (IMR)
9. Crude Death Rate by Cause

III. Marriage Rates:

10. Crude Marriage Rate (CMR)
11. Mean Age at First Marriage

² Source: United Nations, World Population Prospects: the 1996 Revision

IV. Divorce Rates:

.IV

12. Crude Divorce Rate

-12

The vital rates formulas are as follows:

:

METHODOLGY

I. Births and Fertility Rates:

_____ .I

1. Crude birth rate (CBR)

-

The number of live births during a particular calendar year per 1000 mid-year total population:

:

$$CBR = \frac{B}{P} \times 1000$$

Where:

:

B: number of live births that occurred during a particular calendar year (or average annual births of a period).

.()

:B

P: mid-year (or mid-interval) population for the same year or period.

.()

:P

2. General Fertility Rate

-

The number of live births per 1000 mid-year female population of childbearing age (15-49)

(-)

.

$$GFR = \frac{B}{F_{15-49}} \times 1000$$

Where:

:

B: number of live births that occurred during a particular calendar year (or average of a period).

.()

:B

F_{15-49} : mid-year female population aged (15-49) (i.e. in childbearing age).

3. Age Specific Fertility Rate (ASFR)

The annual number of live births per 1000 women of a specified age. Expressed symbolically, it is defined as:

$${}_n f_x = \frac{{}_n B_x}{{}_n F_x} \times 1000$$

Where:

${}_n f_x$: is age-specific fertility rate of women aged x to x+n years.

${}_n F_x$: is the number of women aged x to x+n years at mid-year.

${}_n B_x$: is the number of births to women aged x to x+n years during a calendar year or annual average for an interval.

n: is the number of years in the age interval.

4. Total Fertility Rate (TFR)

It is obtained by summing the age-specific fertility rates for single years of age over the childbearing span and it is computed on a "per woman" basis. It states the total number of children an average woman would bear during her lifetime if she were to bear children throughout her reproductive years at rates specified by the schedule of age-specific fertility rate for the particular year or time interval. It assumes that this hypothetical woman does not die before the end of her childbearing age (i.e. age 50).

The TFR formula is:

$$TFR = \sum_{15}^{49} \left(\frac{{}_n B_x}{{}_n F_x} \right) n$$

Where data are grouped into age intervals of n (usually 5) years.

5. Gross Reproduction Rate (GRR)

It is identical to TFR except that it refers to female births only. This measure indicates how many daughters a woman would bear during her lifetime if, throughout her reproductive life, she is exposed to the age-specific rate of bearing female infant that is recorded for a particular year or certain interval of time. In other words, it is based on ASFR for female births only.

If we multiply the TFR by the proportion of all births in the year that were female, we will obtain a very close approximation of the GRR.

6. Mean Age of Childbearing (MACB)

This is obtained by multiplying the percentage of total births that occur in each age interval by the mid-point of that age interval, then summing across all intervals and dividing the resulting total by 100.

II. Mortality rates:

7. Crude Death Rate (CDR)

The crude death rate is the number of deaths at a certain area during a calendar year per 1000 of mid-year population. It is calculated as:

$$CDR = \frac{D}{P} \times 1000$$

Where:

D: is the total number of deaths at a certain area during a calendar year (or annual average of an interval period).

P: is the mid-year (or mid-period) population living in that area during that year (or period).

()

()

(TFR)

.(GRR)

-

.

.||

-

:

.

:

) :D

.(

() :P

.()

8. Infant Mortality Rate (IMR)

Infant mortality rate is the number of infant deaths (excluding foetal deaths) per 1000 livebirths. It is calculated as:

$$IMR = \frac{D_o^t}{B^t} \times 1000$$

Where:

D_o^t : is the number of infant deaths (excluding foetal deaths) between birth and before reaching the 1st birthday, among residents in an area during calendar year t (or annual average infant deaths for an interval period).

B^t : is the total number of births within the same year t (or interval period).

9. Crude Death Rate by Cause:

The number of deaths from a given cause or group of causes of death at a certain area during a calendar year (or annual average death for an interval period) per 100,000 of the mid-year population. It is calculated as:

$$= \frac{D_c}{P} \times 100,000$$

Where:

D_c : represents deaths from a particular cause or group of causes of death.

P: the population exposed to risk of death from particular cause or group of causes.

III. Marriage and Divorce Rates:

10. Crude Marriage Rate (CMR)

Crude marriage rate is the ratio of the marriages during the year in an area to the average population in that year. The value is expressed in 1000 inhabitants and it is calculated as:

$$\text{CMR} = \frac{M}{P} \times 1000$$

Where:

M: is the total number of marriages occurred at a certain area during a calendar year (or annual average of an interval period).

P: is the total number of person years lived by the population, counted as the mid-year population (or mid interval population).

11. The Mean Age at First Marriage:

The mean age of women (or men) when they first get married. For a given calendar year, the mean age of women (or men) at first marriage can be calculated using the first marriage rates by age. Calculated in this way, the mean age is not weighted, i.e. the different numbers of women (or men) at each age are not taken into account.

14. Crude Divorce Rate

Crude divorce rate is the ratio of the number of divorces during the year to the average population in that year. The value is expressed in 1000 inhabitants. It is calculated as:

$$= \frac{\text{Div}}{\text{P}} \times 1000$$

Where:

Div: is the total number of divorces occurred at a certain area during a calendar year (or annual average of an interval period).

P: is the total number of person years lived by the population living at the same area during the same calendar year (or the interval period), given by the mid-year (or mid-period) population.

Section One

Population

Section I of this Bulletin, entitled “Population”, presents data on population size in the ESCWA region. It contains 13 tables and 12 population pyramids for ESCWA member countries.

(a) In this issue, twelve country tables were added on population distribution by age groups, nationality and sex, in accordance with the latest census data of member countries. All ESCWA member countries, with the exception of Lebanon, conduct a population census every 10 years. Lebanon had its last census in 1932. Almost all the countries undertook their latest censuses between 2003 and 2006. Iraq and Palestine implemented their censuses in 1997 and are expected to undertake their next round in 2007;

(b) Table 13 has been added to provide a comparison between national census population data to those estimated by the United Nations Population Division¹ in the same year. There are some differences to be noted between the actual population and the estimated figures;

(c) Population pyramids for 12 member countries are added in this issue. The country pyramids provide a comparative overview of the age distribution for women and men among the member countries. There are two distinct groups which the countries may be divided into. The first group of countries have a ‘belle’ shaped pyramid with a large base in some (Iraq, Jordan, Lebanon and Palestine) and a narrow top. The second group, includes the Gulf countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and UAE) with a skewed shape for men in the age groups 24-44. This could be attributed to the increase of working age groups of non nationals in the labor market of the Gulf countries.

¹ Data were taken from United Nations Population Division, Department of Economic and Social Affairs (DESA), *World Population Prospects: the 2004 revision*

Data don't include that part of Jerusalem which was annexed forcefully by Israel in 1967.

البيانات لا تشمل ذلك الجزء من محافظة القدس الذي ضمته إسرائيل عنوة بعد احتلالها للضفة الغربية عام ١٩٦٧.

Section Two

Fertility and Mortality

Section II is on Fertility and Mortality. It presents data on births, deaths, infant deaths and causes of death in the ESCWA region from 2000 to the most recent year, for available data in each country². This section contains three tables with their respective graphs.

2000

(a) Table 14, presents the registered number of live births, total number of deaths and number of infant deaths, including the calculated crude birth rate (CBR), crude death rate (CDR), rate of natural increase (RNI) and infant mortality rate (IMR) for each member country since 2000. The Table also includes the estimated rates by the United Nations Population Division for the periods 2000-2005 and 2005-2010.

()

The highest CBR registered in member countries in 2005 was in Syria 36 live births per 1000 population and the lowest was in United Arab Emirates 14 live births per 1000 population. The highest CDR was recorded in Egypt at around 6 deaths per 1000 population and the lowest was in Yemen at around 1 death per 1000 population.

Four countries did not provide registered data on IMR, namely; Jordan, Lebanon, Syria and Yemen. The available data from some of the countries show a slight change in IMR during the reported period. However, major decreases in IMR were registered by Egypt and Oman (9 percentage points), followed by Palestine (5 percentage points) and Qatar (4 percentage points). The highest IMR was in Egypt at 22.6 (2004), followed by Saudi Arabia at 19 and Iraq at around 14 deaths per 1000 live births in 2005.

() ()

()

A bar graph in Fig. 13 presents countries' IMRs, where available, for 2000 and 2005.

()

(b) Table 15, presents data on registered live births, general fertility rate (GFR), total fertility rate (TFR), gross reproduction rate (GRR) and mean age of childbearing from 2000 to 2005.

()

TFR was reported by seven countries, namely; Bahrain, Egypt, Iraq, Kuwait, Oman, Qatar and UAE. Kuwait halved its TFR during the reported period to 2.3 births per woman. Although United Arab Emirates made some reductions in its TFR (0.9 percentage points) from 2000 to 2004 its TFR remains to be the highest among the reported countries in the region.

TFR for the period 1990-2005 is illustrated in six line graphs for the following countries: Bahrain, Egypt, Iraq, Kuwait, Qatar and UAE.

(c) Table 16, presents distribution of causes of death by nationality and sex

()

classified in accordance to the International Classification of Diseases.

In 2005 the major causes of deaths in the ESCWA region are attributed to: Diseases of the circulatory system; Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified; and Certain infectious and parasitic diseases.

² Only those countries for which relevant data are available have been included in the tables, and averages have been calculated on the basis of national figures. For data before 2000, refer to the previous issues.

Annex 1: International Classification of Causes of Death

Serial no.	Cause of Death		
1	Certain infectious and parasitic diseases	امراض معدية وطفيلية معينة	1
2	Neoplasms	الاورام	2
3	Endocrine, nutritional and metabolic diseases	امراض الغدد الصماء والتغذية والتمثيل الغذائي	3
4	Disorders of the blood and blood-forming organs and certain disorders involving the immune mechanism	إضطرابات الدم واعضاء تكوين الدم واضطرابات معينة تشمل اضطرابات المناعة	4
5	Mental and behavioural disorders	الاضطرابات العقلية والسلوكية	5
6	Diseases of the nervous system	امراض الجهاز العقلي واعضاء الحس	6
7	Diseases of the circulatory system	امراض الجهاز الدوري الدموي	7
8	Diseases of the respiratory system	امراض الجهاز التنفسي	8
9	Diseases of the digestive system	امراض الجهاز الهضمي	9
10	Diseases of the genitourinary system	امراض الجهاز التناسلي البولي	10
11	Pregnancy, child birth and the puerperium	مضاعفات الحمل والولادة والنفاس	11
12	Diseases of the skin and subcutaneous tissue	امراض الجلد والنسيج تحت الجلد	12
13	Diseases of the musculoskeletal system and connective tissue	امراض الجهاز الهيكلي العظمي والنسيج الضام	13
14	Congenital malformations, deformations and chromosomal abnormalities	تشوهات خلقية، وعاهات وشدوذ كروموزي	14
15	Certain conditions originating in the perinatal period	اسباب معينة لحالات المرض والوفاة حول موعد الولادة	15
16	Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified	امراض وحالات غير معينة وغير مشخصة في مكان اخر	16
17	Injury, poisoning and certain other consequences of external causes	الاصابات والتسمم ونتائج اخرى معينة لاسباب خارجية	17
18	Codes for special purposes	حالات غير مشخصة	18
19	Diseases of the eye and adnexa	امراض النظر	19
20	Diseases of the ear and mastoid process	امراض السمع	20
21	External causes of morbidity and mortality	لاسباب خارجية للمرض والوفاة	21
22	Factors influencing health status and contact with health services	عوامل تؤثر على الوضع الصحي واتصال بالخدمات الصحية	22

Section Three

Marriages and Divorces
